January 13th, 2014

Dear Potential Sign Purchaser,

Within the sign industry, few markets can match the opportunities of turnkey institutional signage.

As founder, President and CEO of the J. M. Stewart Corporation from 1968 until retiring in late 2001, I dominated this field especially in the niche markets of churches and schools. For 11 years until my retirement, ESCO Manufacturing, Inc. supplied all J. M. Stewart Corporation signs (in excess of 13,500). I insisted on and got the best quality product possible.

I know ESCO's staff and capabilities better than anyone and I remain absolutely confident that the same level of quality that I experienced with ESCO continues to be brought to the market today.

I heartily recommend ESCO Manufacturing to you because beyond a quality product stands a dedicated company of people with integrity that is second to none. Through "thick and thin" I could always count on ESCO to perform above and beyond expectations. ”

Sincerely,

J. Melvin Stewart
Founder of J.M. Stewart Corporation

ESCO Manufacturing, Inc.,

is an electric sign manufacturer with over nearly 50 years of experience and more than 100 employees at two facilities.

ESCO specializes in everything from custom projects to large program fulfillment, and has established itself as a leading manufacturer of institutional signage.

ESCO is a principle player in advancing signage technology and consistently performs at the highest level of quality and service, elevating industry standards and operating with customer goals in mind.

Signs QUALITY FEATURES

With over 40 years manufacturing signs - including the past 18 in the specialty institutional offering - ESCO has perfected the blend of **design, materials, manufacturing processes**, and **quality control** with dedicated **craftsmanship** to produce a product of exceptional quality and value. We stand behind this product with an unmatched satisfaction guarantee. We maintain one of the highest production and delivery standards in our market.

Good design is a prerequisite to quality fabrication. ESCO's product designs are a unique marriage of function, structural integrity, marketability, and value. At ESCO we have the experience to incorporate market demands and manufacturing efficiencies into an effective sign design to offer the **most durable institutional signs available**.

THE BEST MATERIALS

Years of experience have resulted in selecting only the best-specialized materials. Even an exceptional design is limited in performance without equally proven raw materials. As applicable, ESCO incorporates premium materials and brand name components into the sign design.

DEDICATED CRAFTSMANSHIP

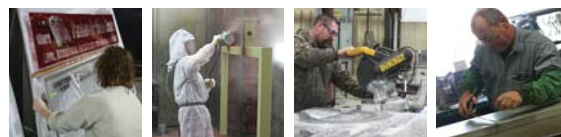

Design and materials are only as good as the people behind them. ESCO provides an unparalleled depth of knowledge, experience, dedication and craftsmanship.

We work closely with our suppliers for specialized staff training. From painting to testing to crating, we've gone the "extra mile" to work with our vendors to ensure the best performance from their products and services.

- **Certified painters** strictly follow procedures and recommended techniques of our paint suppliers.
- Our **certified welders** are experts at their trade to ensure product stability without sacrificing visual appeal.

PROVEN MANUFACTURING PROCESSES

We understand that performance is in the preparation. ESCO has developed effective manufacturing processes that ensure the best performance in the field before our signs are painted and assembled.

QUALITY CONTROL

ESCO has incorporated quality control practices over the years to ensure the consistency of our high quality standards to meet market expectations.

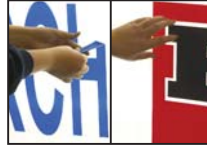

Signs

SIGN FEATURES

Unbreakable Sign Face

Faces are formed from solar grade co-extruded polycarbonate to resist damage from impact and includes a UV inhibitor to prevent yellowing due to sunlight.

Second Surface Decoration

3M™ high performance vinyl and digital prints are applied second surface (inside the face) protected both from vandals and the elements.

Fiberglass Decorative Trim

Gives a smooth, three-dimensional finished look.

Not available in all sizes.

Graffiti-Resistant Paint

Paint is baked on at 180°; graffiti can easily be wiped away.

Locking Vandal Cover

A keyed locking vandal cover system keeps vandals from getting access to the message.

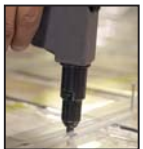

Easy Copy Changes

Self-supporting mechanical props, support the vandal cover opening to 90° for ease of message changes.

Planked Face

Planking in the face adds rigidity to keep the face from sagging and allows air, water and debris to flow through.

Riveted Copy Track

Rivets hold stronger than glue and in combination with the planking allow for easy cleaning.

Strong Structure

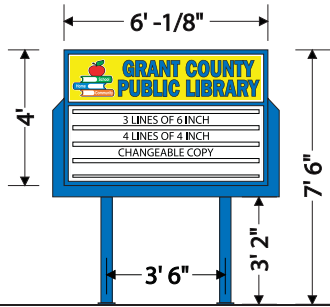

Engineered for strong wind loads to accommodate zoning regulations.
